

Free Java Charts

SpiceJavaCharts is a Java library for creating 2D and 3D Charts for your web site or web application. Using SpiceCharts library you can create very fast differend types of charts, only with few lines of code. SpiceCharts supports 2D and 3D pie charts, horizontal and vertical bar charts and line charts. Very easy to use and to integrate within web applications and web pages and also easy customizable for individual types (title, colors, size, transparency, legend type, 3D depth etc).The software comes both as java applet or as java library. It runs on all major web browsers and are compatible with JDK 1.3 or higher. All charts have a smooth look due to the antialiasing feature.

Java Chars are available for free in java binary form.
