

Javascript Disable Right Click

If you have quality content on your webpage and want to prevent people stealing your resources, you can add this script to disable the right-mouse click. This does not assure complete safety for your resources (there is always a way to copy them), but it is better than nothing. :) [Click here to see a demo page.](#)

Note1: The following script works for IE6 and Netscape.

Note2: Right click cannot be disabled for Opera browsers!

The Javascript function that is listed below. To use it paste the code into the `<script>` section of your page

```
<script>
var isNS = (navigator.appName == "Netscape") ? 1 : 0;
if(navigator.appName == "Netscape")
    document.captureEvents(Event.MOUSEDOWN||Event.MOUSEUP);
function mischandler(){
    return false;
}
function mousehandler(e){
    var myevent = (isNS) ? e : event;
    var eventbutton = (isNS) ? myevent.which : myevent.button;
    if((eventbutton==2)||(eventbutton==3)) return false;
}
document.oncontextmenu = mischandler;
document.onmousedown = mousehandler;
document.onmouseup = mousehandler;
</script>
```
