

PHP Tutorials and Web Design Resources | Home Page

Reconn.us is your website for Web Programming. You will find here valuable resources and advices for creating an Internet based business, tutorials and free scripts.

Here is a gift from us: PHP Contact us script. Every website needs a contact page. It does not matter the purpose of the site: a business or a personal website, the contact us page facilitate a quick feedback from your visitors since sometimes they are lazy to write emails. Free Contact Us are designed in a profesional way: to look simple but nice, to be easy to use separate or to easely integrate into your website. The only requirement is PHP. There is not need for MySQL. Writing Contact Us forms was always a problem when creating or updating a new website. You will not need anymore to write yourself a Contact us form.

Check our tutorials and resources. I hope you will like it!
